Tiger Rear Ends RF85

Davis Scites, runs and has done all the testing for the RF85, Tiger Quick Change Rear Ends. Davin has the first RF85 Tiger Rear End ever built, he as of this month has been running his RF85 Tiger Rear End 3-1/2 seasons, and runs only the longer races 50 to 300 laps.

The 06 car of Davin Scites has competed with the best of the best in Late Model Racing and has racked up 11 wins, 32 top 5's, and 40 top 10's in the past 3-1/2 seasons. When Davin shows up he is always one of the guys to beat.

After Setting on the pole at Martinsville dominating the first half of the race then falling prey to the half way inversion, worked his way back to third with a very dominate car, plus breaking the Truck record qualifying, not bad when you consider that 110 to 115 cars show up to fill a 43 car field.

Now back to this RF85 rear. After 6000 race laps and 4000 test laps you would not believe what this rear looks like. If Tiger did not build and maintain this rear we would say no way it looks as good if not better than the day we built it.

To this day no parts have been changed in this rear, excluding three locker spring changes in 3-1/2 seasons. All of this has been accomplished with just 1 quart of Tiger High Performance Synthetic Gear Lube. This is a testament to the RF85. Try this without RF85 and you will be sitting in the trailer.
